SUPERINTENDENT'S REPORT

The month of November marked the close of five years of working together in Supervisory Union No. 4 under a new superintendent and it is a source of satisfaction to look back and count the achievements which have been made possible through the cooperation of teachers, school board members, taxpayers the State Board of Education, and the pupils themselves. All rooms have been painted, many have new lights, nine buildings have been painted outside, seven roofs have been redone, new heating installed in several buildings, improved playground equipment in at least two instances, and last, but not least are two new buildings underway. These are all material achievements. To improve much on these matters will involve very expensive spending, and with future uncertainties it is well that these things have been done. Non-material accomplishments have consisted in three teacher workshops, regrading of schools, extensive summer school attendance by the teachers, and the maintenance of a very competent teaching staff in spite of differences in ages, training, experience, and the lowest salaries in the state. How much longer this can be done is pure guess-work.

Our educational offerings in most towns are very limited and kept to the barest essentials. Only two towns offer music supervision, one offers hand writing supervision, none has art supervision, remedial reading or physical education. High school offerings are almost equally limited but Bristol's will be quite modern on completion of the new school and proper staffing of the same. Yet the lake region section of Union 4 is, by any objective standard, one of the richest in the state and for this basic reason will never

receive much, if any, state aid as long as a formula is based solely on need.

Solutions to our educational needs are not easy, and are expensive. Present state aid formulas are totally inadequate as to amount. A million dollars this year will probably not cover the new inflationary trend. The net result of this, both as to better educational opportunities for our children and for tax relief, will be close to zero. The basic purpose of any sound state aid program is to improve educational opportunities and not to absorb inflationary trends over which we have absolutely no control.

Probably the taxpayers of Bridgewater, Hebron and Groton wonder why these towns receive no state aid for their schools. These formulas are complicated affairs but perhaps one set of figures will help clarify this situation. To qualify for aid under the proposer formula Bridgewater would have to assess itself for more than \$17,110; Hebron for more than \$12,721; Groton for more than \$8,289. There is danger in stopping here for these assessments alone would not qualify the towns for aid unless they had pupils enough figured at \$175 for each elementary pupil and \$225 for each high school pupil to warrant such expenditures. Obviously none of these towns has enough pupils and all have a relatively large tax base. Stating it another way Hebron with 13 pupils (1949-50) has an equalized valuation of \$732,731 while Danbury with 115 pupils has an equalized valuation of \$598,367. Such inequalities are very apparent. Only when flat grants of money per pupil become a part of state aid will these three towns receive any aid, and then not much. In other words these three towns in varying degrees have a tax base big enough to do what they will for themselves.

Respectfully Submitted,
C. Maurice Gray
